FOR IMMEDIATE RELEASE:

HCA now offering ground-breaking Pain Management treatments

Healthcare Associates in Medicine, P.C. (HCA) is proud to announce a series of ground-breaking Pain Management options now being offered to the local community. Any patient suffering from pain or discomfort can be a candidate! These state-of-the-art treatments are available in both of our primary clinical locations at **1099 Targee Street, Staten Island, NY 10304** and **3311 Hylan Boulevard, Staten Island, NY 10306**.

Board-certified physician **Dr. Glenn D. Babus** recently began performing **amniotic fluid injections**. Using fluid derived from donated human placental amnion fluid, the non-invasive procedure contains more than 100 growth factors and other nutrients. It encourages healing in cells and soft tissue without the risk of dangerous side effects. And it works! Patients who have had the injection have seen their pain relieved significantly.

Transitioning from the amniotic fluid injections Dr. Babus is also now performing **adult stem cell therapy injections**. Adult stem cells are early stage cells and are capable of developing into other types with the potential to regenerate damaged tissue. Understanding this, our team uses a needle to withdraw bone marrow from the patient's lower back area. A trained nurse then uses specific equipment to concentrate the stem cells and growth factors in the bone marrow and provides the cells back to the doctor for implantation into the targeted pain area. This option treats a variety of issues including degeneration, soft tissue and bone related injuries.

Our Pain Management physicians are also now offering **advanced spinal cord stimulators**. A stimulator device is used to exert pulsed electrical signals to the spinal cord to control chronic pain. This option typically offers patients 50-70% pain relief. The new stimulators, however, are producing outcomes with up to 90% pain relief!

We are proud of the innovative techniques being offered to our patients. These new treatment options are further testament to our decades-long approach to offering the best and most comprehensive care available. Patients interested in making an appointment with one of our physicians are encouraged to call **718-448-3210**. For more information on our Pain Management team and the new procedures being offered, please contact **Matt Richardson (718-448-3210/PR@hca-si.com)** or visit **hca-si.com**. We also update our Facebook page daily at **facebook.com/healthcareassociatesinmedicine** and tweet **@HCASI**.
