

**Healthcare Associates in Medicine,
A Division of Orlin & Cohen Medical Specialists Group**

Job Title: Registered Nurse **Department:** Neuroscience/Pain Management
Reports to: Director of Clinical Services

Staten Island, NY - Large multi-specialty practice is hiring for Part-Time and Per-Diem Registered Nurses. Shifts are day only - no on-call, no overnights, and on weekends.

Job Summary:

The Registered Nurse is to be clinically competent; delivers care to patients utilizing the nursing process of assessment, planning, intervention, implementation, and evaluation; and effectively interacts with physicians, patients, significant others, and other health team members while maintaining standards of professional nursing. EOE.

The Full-time position will be scheduled to work 42.5 hours per week. Per-Diem positions will be scheduled in advance as needed. Days and hours of work will be determined at the time of hire. This position is located on Staten Island, NY. This full-time position will offer a competitive salary, Paid Time Off, and a full range of benefits. EOE.

Education/Experience:

- Graduate of an accredited school of Nursing.
- Valid registration as a Registered Nurse in the State of New York.
- Current AHA Healthcare Provider training (BCLS and ACLS).
- At least 2 to 4 years of experience in patient care setting and pain management specialty preferred
- Working knowledge of Electronic Medical Records Systems.
- Experience working in Critical Care Units, Operating, and Recovery Rooms.
- Knowledgeable regarding the nursing process and its application, including the assessment, planning, implementation, and evaluation of nursing care.

Position Responsibilities/Standards (include but are not limited to):

- Assess the patient; collect and document the patient's current health status and medical history. Complete and/or review Admission Data Record as defined by the policy. Make an accurate and ongoing assessment of the patient's status and respond appropriately.
- Plan/Implement; set priorities for nursing action in a logical sequence according to patient's needs and formulate a plan of care by the appropriate selection of Nurse Practice Standards. (UOC's) The Plan of Care is initiated on patient admission based on all aspects of the initial assessment. The plan includes physiological, psychosocial, and environmental factors: patient/significant other education and patient discharge planning.
- Evaluate; perform ongoing assessment and revise plan of care based on new data and patient's condition.
- Document accurate and ongoing assessment of patient status. Document patient care which reflects nursing intervention, patient response to care provided, patient needs, problems, capabilities, limitations, and progress toward goals. Documentation includes evidence of
